## Overview

The primary Objective of this document is to provide guidance regarding the upgrade of T24 release and TAFJ release for existing TAFJ areas.

## Pre requisite: TAFJ DEV image.

## Procedure

### TAFJ Upgrade:

Following is the procedure to upgrade TAFJ libraries in the existing area.

Please download the latest TAFJ version .zip file (e.g. TAFJ\_201209\_01.zip ) from the following URL .

<http://10.41.5.51:11112/FP/>

Once downloaded, please unzip the file into a folder and you should be able to see the following files inside the folder.

Name	Date modified	Type	Size
 Patch_TAFJ.201209_01	11-09-2012 21:33	Windows Batch File	1 KB
 Patch_TAFJ.201209_01.sh	11-09-2012 21:33	SH File	1 KB
 Setup_TAFJ.201209_01	11-09-2012 21:33	Windows Batch File	1 KB
 Setup_TAFJ.201209_01.sh	11-09-2012 21:33	SH File	1 KB
 TAFJ.201209_01	11-09-2012 21:33	Executable Jar File	98,488 KB

For upgrading, we make use of Patch\_TAFJxxx.bat on windows and Patch\_TAFJxxx.sh for other operating systems.

Before launching the Patch\_TAFJxxx.bat, make sure we have the following environment variables set

Launch a Command Prompt (CMD) to set the following Environment variables temporarily.

## JAVA\_HOME

For 64 bit machines

```
SET JAVA_HOME=D:\Temenos\Development\3rdParty\jdk\jdk1.6.0_29-64
```

For 32 bit machines

```
SET JAVA_HOME=D:\Temenos\Development\3rdParty\jdk\jdk1.6.0_29-32
```

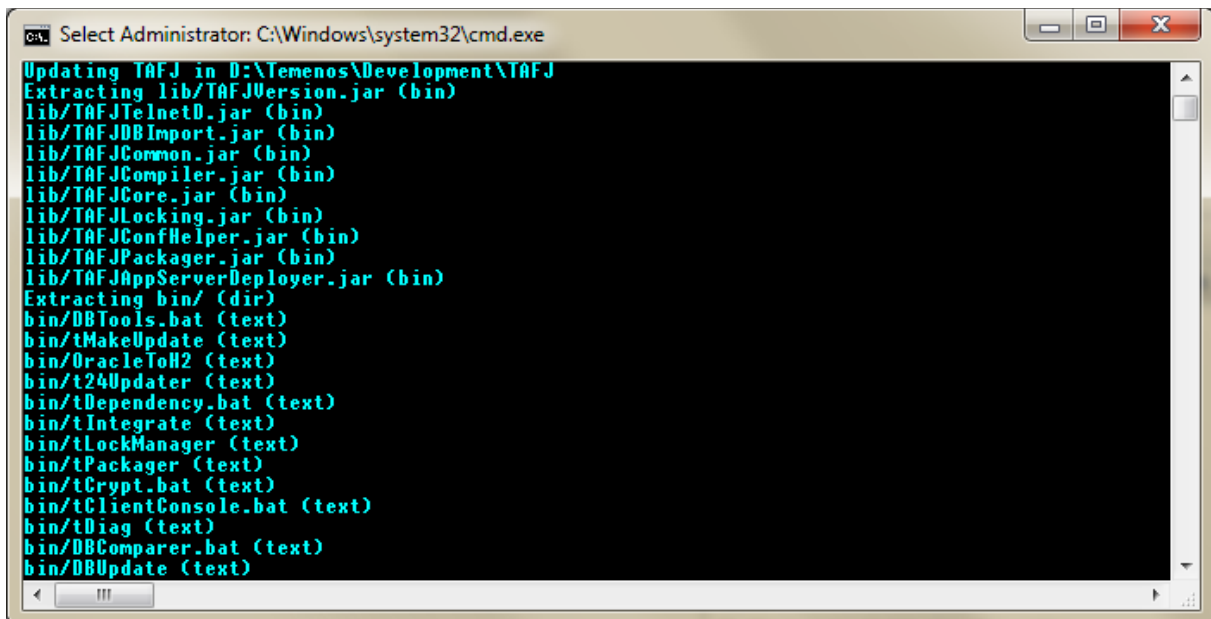

## TAFJ\_HOME

```
Set TAFJ_HOME=D:\Temenos\Development\TAFJ
```

## ECLIPSE\_HOME

```
SET ECLIPSE_HOME= D:\Temenos\Development\TAFJ\ECLIPSE
```

Once set, we can run the Patch\_TAFJxxx.bat/sh.

```
Select Administrator: C:\Windows\system32\cmd.exe
Updating TAFJ in D:\Temenos\Development\TAFJ
Extracting lib/TAFJVersion.jar (bin)
lib/TAFJTelnetD.jar (bin)
lib/TAFJDBImport.jar (bin)
lib/TAFJCommon.jar (bin)
lib/TAFJCompiler.jar (bin)
lib/TAFJCore.jar (bin)
lib/TAFJLocking.jar (bin)
lib/TAFJConfHelper.jar (bin)
lib/TAFJPackager.jar (bin)
lib/TAFJAppServerDeployer.jar (bin)
Extracting bin/ (dir)
bin/DBTools.bat (text)
bin/tMakeUpdate (text)
bin/OracleIoH2 (text)
bin/t24Updater (text)
bin/tDependency.bat (text)
bin/tIntegrate (text)
bin/tLockManager (text)
bin/tPackager (text)
bin/tCrypt.bat (text)
bin/tClientConsole.bat (text)
bin/tDiag (text)
bin/DBComparer.bat (text)
bin/DBUpdate (text)
```

This will upgrade the necessary folders with the new contents from the new release.

Now you can restart your Eclipse for your new jars to be loaded for use.

**Note :** For Application Servers like Jboss , the following files should be replaced with the existing files under JBOSS\_HOME/server/<context>/deploy folder. Where context can be default or a specific folder. (i.e for modelbank\_tafj , context is R12)

- TAFJJEE\_EAR.ear file
- TAFJJEE\_EAR\_Monitor.ear file

The above files can be found under TAFJ\_HOME/appserver folder.

## T24 Upgrade

### TEMP.RELEASE

Following is the procedure for upgrading the T24 libraries and data to higher release making use of TEMP.RELEASE provided by Integration team. ( TAFJ.R12\_201214 or higher)

Before going for upgrade, we will make sure that the existing precompiled jar files are present in a single folder and this folder is referenced in precompiled path on tafj.properties file under TAFJ\_HOME/conf folder.

i.e.

in tafj.properties

```
temn.tafj.directory.precompile = /glodev1/tafj/tafjx01/precompiled
```

**(Where in the precompiled folder contains all the precompiled jar files including Enterprise jars.)**

To start the upgrade process, we launch the following command from DBTools under TAFJ\_HOME/bin

Syntax :

```
TEMP-RELEASE [options] pathToTempRelease pathToLibDestinationFolder [-i pathToInsertDestinationFolder] [-bp pathToSrcDestinationFolder]
```

Where options can be

- s (script mode)
- log (<name of log >. To be generated under TAFJ\_HOME/log )
- cf <Configuration file>

Now start the upgrade process by launching this command from DBTools.

```
DBtools -cf tafj.properties -log tmprelease.log TEMP-RELEASE  
glodev1/tafj/tafjx01/temp.release /glodev1/tafj/tafjx01/precompiled -bp  
/glodev1/tafj/tafjx01/Source/t24_bp
```

Where

**tafj.properties** is a configuration file

**tmprelease.log** is the name of the log file to be generated in TAFJ\_HOME/log folder,

**/glodev1/tafj/tafjx01/temp.release** is the path where my temp.release folder is present

**/glodev1/tafj/tafjx01/precompiled** is path where my precompiled jars are present.

```
$ DBTools -cf tafj.properties -log tmprelease TEMP-RELEASE /glodev1/tafj/tafjx01/temp.release /glodev1/tafj/tafjx01/Source/T24_BP  
-----  
DBTools                               SPOOL ON                               P1:1 C1:1  
-----  
Deploying temp.release from: /glodev1/tafj/tafjx01/temp.release  
Current release is: R12  
Will upgrade to the following release: 201213  
Starting upgrade process  
Deploying jars file  
Jars file upgraded in - 0 Hrs 0 Mins 7 Secs  
Deploying source code  
Source code upgraded - 0 Hrs 6 Mins 31 Secs  
Upgrading F.PGM.DATA.CONTROL  
F.PGM.DATA.CONTROL upgraded - 0 Hrs 3 Mins 15 Secs  
Upgrading F.RELEASE.DATA  
F.RELEASE.DATA upgraded - 0 Hrs 6 Mins 44 Secs  
T24.UPGRADE terminated successfully  
-----  
tafj@10.92.5.138:TAFJR13D>X  
-----
```

## Creating a J4 file SYSTEM and pointing to TEMP.RELEASE

```
-----  
File SYSTEM, Record TEMP.RELEASE      UNLOCKED  
-----  
1      D  
2      /glodev1/tafj/tafjx01/temp.release  
  
-----  
Command({1},i{1},d{1},b,f,c,r,s,x,help) : █
```

## T24.PRE.RELEASE

Add the following property in the configuration properties file in TAFJ\_HOME/conf

**JEDIFILENAME\_SYSTEM=SYSTEM**

The process of upgrade can be monitored in the log file specified , i.e. tmprelease.log under **TAFJ\_HOME/log** folder.

Once Finished the first phase of upgrade, we need to run T24.PRE.RELEASE routine.

tRun T24.PRE.RELEASE

```
201015.006

-----

RELEASE NUMBER IS T24.PRE.RELEASE
SELECT LIST NAME IS T24.PRE.RELEASE

-----

01 FEB 2013 16:28:50  USER                [53210,]
ACTION Transfer of records to data accounts complete.
$ █
```

After executing the T24.PRE.RELEASE, you should be able to see the file in &SAVEDLISTS& with the files records being exported into T24 for preliminary use.

```
$ ls
T24.PRE.RELEASE
$ ls -ltr
total 8
-rw-rw-rw-  1 tafjx01  staff          306 Feb 01 16:29 T24.PRE.RELEASE
$ █
```

```
5.PGM.FILE>T24.UPGRADE
F.PGM.FILE>RUN.CONVERSION
F.TSA.SERVICE>TSM
F.TSA.SERVICE>T24.UPGRADE
F.TSA.SERVICE>RUN.CONVERSION
F.BATCH>T24.UPGRADE
F.BATCH>RUN.CONVERSION
F.TSA.WORKLOAD.PROFILE>TSM
F.TSA.WORKLOAD.PROFILE>T24.UPGRADE
F.TSA.WORKLOAD.PROFILE>RUN.CONVERSION.PROFILE
F.STANDARD.SELECTION>TSA.SERVICE
~
```

Once this process is finished, we need to run the service T24.UPGRADE to release the Data records and create file where ever necessary .

## T24.UPGRADE

Set the record T24.UPGRADE of F.TSA.SERVICE to START.

```

</job>
</process>
</service>
Agent stopped|
</como>
    
```

Once this process is finished, we can now login into T24 and run the enquiry EXCEPTION to have a look at the data records which are in \$INAU status .

**NOTE :** Since the Enquiry EXCEPTION, make use of IDESC **USER.REC**, we make the following changes to make this enquiry work in TAFJ without making use of IDESC.

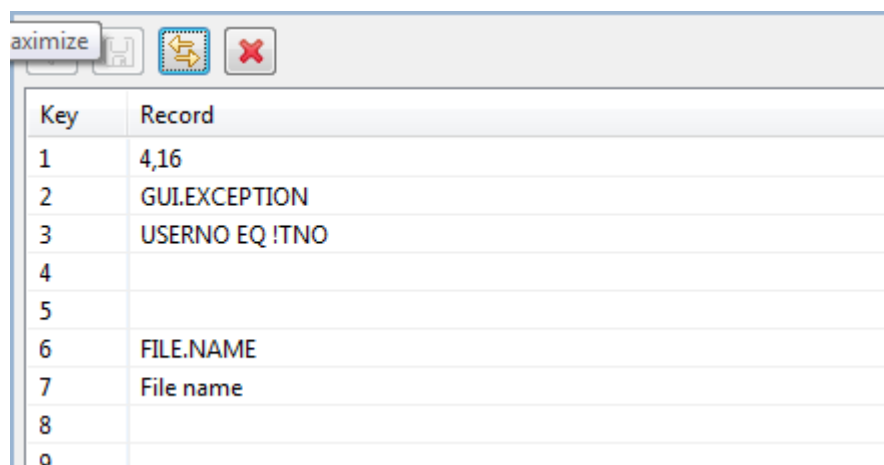

## Change F.ENQUIRY EXCEPTION

JED F.ENQUIRY EXCEPTION

Replace 3<sup>rd</sup> field with the following values.

Instead of **USER.REC EQ 1** replace with **USERNO EQ !TNO**

remove SORT.FLD from 4th field .

Key	Record
1	4,16
2	GUI.EXCEPTION
3	USERNO EQ !TNO
4	
5	
6	FILE.NAME
7	File name
8	
9	

Once done, we run the enquiry EXCEPTION .

```

We can either authorize the records manually or can use a program AUTO.AUTHORISE to authorize all the existing \$NAU records.

## AUTO.AUTHORISE

AUTHORISING RECORDS using routine AUTO.AUTHORISE.

This routine should be launched from TAFJ\_HOME/bin folder with an argument –S (to make read the list file from &SAVEDLIST&)

tRun AUTO.AUTHORISE –S

The program prompts for USERNAME/PASSWORD for authorizing along with name of file from &SAVEDLISTS&.

Here we need to specify the filename REL.201209.DATA generated in &SAVEDLISTS&.

```
<terminated> AUTO.AUTHORISE [BASIC Program] D:\Temenos\Development\3rdParty\jdk1.6.0_29-32\bin\java
INPUT T24 USERNAME FOR AUTHORIZING :
?INPUT
INPUT PASSWORD :
?123456
Enter list ID from Savedlists :REL.201209.DATA
